Summary

Shopify-focused commerce architect with 3 years of experience designing and delivering enterprise-grade Shopify Plus solutions across global markets. Specialized in headless commerce architecture (Hydrogen / Storefront API), platform migration strategy, and third-party integration design.

Independently architected multi-region commerce infrastructure across 5 international markets, led full platform transformation from legacy B2B workflows to scalable API-first Shopify systems, and built LLM-powered automation pipelines reducing operational workload by 70%. Strong hands-on experience across eCommerce domains including catalog management, checkout, payments, and OMS integration. Proven ability to define target-state architecture, integration patterns, and data migration strategy for high-volume global Shopify Plus implementations.

Technical Skills

Commerce Platforms: Shopify Plus, Shopify Hydrogen (Headless), Liquid, Storefront API, Admin API, GraphQL

Architecture: Headless Commerce, Platform Migration Strategy, Target-State Architecture, Integration Patterns, API-First Design

eCommerce Domains: Catalog Management, Checkout & Payments, Multi-Currency Pricing, Order Management (OMS), Localization

Integrations: Payment Gateways, Logistics Providers, ERP Connectors, Analytics Services, Webhooks

Frontend: React.js, Next.js, Vue.js, Tailwind CSS **Backend:** Node.js, Express.js, REST APIs

3D & AR/VR: Three.js, React Three Fiber, WebGL, GSAP (ScrollTrigger, Timeline Animations), Photoreal 3D Product Rendering, AR/VR Virtual Try-On, GLTF/GLB/CAD Model Pipelines

AI & Automation: LLM APIs, Automation Pipelines **Tools:** Git, Vercel, CI/CD, Core Web Vitals

Experience

Senior Shopify Engineer & Commerce Architect

Apr 2026 – Present

The Diamond Port

- Defined target-state Shopify Plus architecture across 5 global markets (US, UK, Germany, Australia, Canada) covering catalog, checkout, multi-currency payments, and OMS integration
- Led headless commerce migration to Shopify Hydrogen and Storefront API, decoupling frontend from monolith and improving engineering velocity by 3x
- Designed data migration strategy and integration patterns for 2,000+ SKU catalog with cross-border fulfillment and localization workflows
- Built LLM-powered automation pipelines (Node.js) replacing manual commerce operations and reducing workload by 70%
- Architected extensibility framework covering payment, logistics, and analytics integrations within the Shopify Plus ecosystem

Full Stack Shopify Developer

Apr 2025 – Mar 2026

The Diamond Port

- Built and deployed 5 production Shopify storefronts for international markets with localization, multi-currency, and performance tuning
- Executed platform transformation from legacy manual B2B system to scalable Next.js + GraphQL marketplace – equivalent in scope to a headless platform-to-Shopify migration
- Integrated payment gateways, third-party logistics, and analytics services via Admin API and webhooks

Frontend Engineer (React & Vue)

Apr 2024 – Mar 2025

The Diamond Port

- Developed high-performance UI systems for global eCommerce platforms with a focus on Core Web Vitals and scalability
- Built reusable component architecture reducing development time by 30%
- Optimised storefront rendering and mobile responsiveness across international markets

React.js Intern

Oct 2023 – Mar 2024

The Diamond Port

- Delivered production React components across live commerce systems; integrated third-party APIs and responsive UI modules

Key Projects

Multi-Region Shopify Plus Architecture (5 Markets)

- Architected unified Shopify Plus infrastructure across US, UK, Germany, Australia, and Canada with market-specific catalog, checkout, and pricing configurations
- Defined integration layer covering payments, OMS, logistics, and analytics – aligned with enterprise migration architecture patterns

B2B Platform Migration & Marketplace

- Led full platform transformation from legacy manual workflows to Next.js + GraphQL B2B marketplace handling 2,000+ SKUs and cross-border transactions
- Designed data migration strategy and API orchestration layer – comparable in scope to a commercetools/VTEX-to-Shopify migration

Headless Commerce Migration (Hydrogen / Storefront API)

- Designed and executed headless Shopify migration using Hydrogen and Storefront API, replacing tightly-coupled storefront architecture and achieving 3x development velocity improvement

AI Commerce Automation

- Built LLM-powered pipelines for inventory management, order reporting, and operational workflows integrated with Shopify Admin API – eliminating 15+ hours of manual weekly work

i3dStudio – 3D Rendering & AR/VR Try-On SaaS

i3dstudio.vercel.app

- Built a full-stack 3D SaaS platform that converts CAD files (3DM, GLB, GLTF, STL, OBJ, FBX, DAE, PLY) into photoreal, interactive 3D product viewers using Three.js / React Three Fiber
- Implemented AR/VR virtual try-on with three modes – live camera hand-tracking, photo upload, and model-hand preview – plus automatic size estimation
- Shipped embeddable, domain-locked 3D viewer widgets and a public REST API/SDK for Shopify and third-party site integration
- Designed credit-based rendering pipeline (4K stills, turntable video, multi-angle exports) with tenant isolation and Stripe billing

GSAP Motion & Interactive Web Builds

- Delivered scroll-driven and timeline-based motion design using GSAP (ScrollTrigger) across production sites including eye.hi-labsolution.org (healthcare), thechiku.in (events/hospitality), and radiantsunenergy.com (renewable energy)
- Built smooth, high-performance scroll and section-reveal animations tailored to each brand's UX while maintaining Core Web Vitals

Education

Master of Computer Applications (AI & ML)

2024 – 2026

Parul University

Bachelor of Computer Applications

2021 – 2024

Veer Narmad South Gujarat University

Key Achievements

- Architected Shopify Plus infrastructure across 5 international markets with catalog, checkout, OMS, and payments integration
- Reduced operational workload by 70% through LLM-powered commerce automation
- Led headless migration (Hydrogen/Storefront API) achieving 3x engineering velocity improvement
- Designed and executed platform transformation from legacy workflows to API-first Shopify architecture – equivalent scope to enterprise headless-to-Shopify migration
